

TELEPRACTICE INFORMED CONSENT FORM

The American Speech and Hearing Association (ASHA) defines telepractice (the act of providing Telehealth services) as "the application of telecommunications technology to delivery of professional services at a distance by linking clinician to client, or clinician to clinician, for assessment, intervention, and/or consultation." This service delivery model is supported by the California licensing board, the American Speech-Language and Hearing Association (ASHA), and is payable by most insurance carriers per the Telehealth Enhancement Act of 2013- H.R.3306, 113th Congress and California Insurance Code 10123.85, Sections 2290.5 of the Business and Professions Code. Telepractice is viewed as a mode of delivery of health care services, not a separate form of practice. There are no legal prohibitions to using technology in the practice of speech language pathology, as long as, the practice is done by a California licensed practitioner. The standard of care is the same whether the patient is seen in-person, through telehealth (telepractice) or by other methods of electronically enabled health care.

As such, Madison Gwizdalski, MS, CCC-SLP, offers telepractice speech therapy services through the live interactive video conferencing software platform Zoom. Our client will connect over the internet by going to zoom.us online and entering the meeting ID provided to them by Madison Gwizdalski. The speech therapist will then admit the client to the meeting when services are ready to be provided. The practitioner and the client will then be able to see and hear each other in real time. The therapist is able to perform diagnostic assessments and provide treatment. Our business agreement with the Zoom platform incorporates software security measures that meet HIPPA standards. This is in place to protect the confidentiality of patient identification and data and protect against intentional or unintentional corruption.
